

Designed specifically for the transport industry.

30KLT DIESEL TANK AND THE 5KLT DEF (AD BLUE) TANK BOTH WITH COMPAC DISPENSING AND CREDIT CARD DCA MANAGEMENT SYSTEM.

Using AdBlue in line with manufacturers' requirements and a catalytic converter it reduces the level of oxides of nitrogen emitted from engines and then out into the environment. It's a solution to ensure a better future for all of us. Available in 3,000, 5,000 L & 10,000 L. Specifications as below:

Tank Model	DEF Safe Fill Litres	Length mm	Width mm	Height mm
LTAD3	3,000	2,572	1,129	2,566
LTAD5	5,490	3,920	1,147	2,550
LTAD10	11,500	3,960	2,250	2,504

* tank height only; excludes external pipework

These tanks are built to the highest international standards to prevent against contamination with other products, the environment and to safely store this corrosive liquid. All tanks are insulated between tank walls to ensure a consistent internal temperature of the solution.

Each of the tanks in the range can be fitted with your choice of pumping and metering solutions and are manufactured and fitted out with the highest quality components and systems.
