

FuelcoTM
complete fuel storage solutions

SERVICE & MAINTENANCE

- ON-SITE & REMOTE SUPPORT
- TANK & EQUIPMENT REPAIRS
- REFURBISH PUMPS & BOWSERS
- INFRASTRUCTURE UPGRADES
- COMPLIANCE CHECKS
- CLEANING & RESTORATION

AFTER SALES SERVICE & REPAIR

We provide cradle-to-grave solutions, from manufacturing to installation, commissioning & de-commissioning, preventative maintenance and breakdown repairs of tanks and parts, all tailored to your requirements.

ON-SITE OR REMOTE SUPPORT

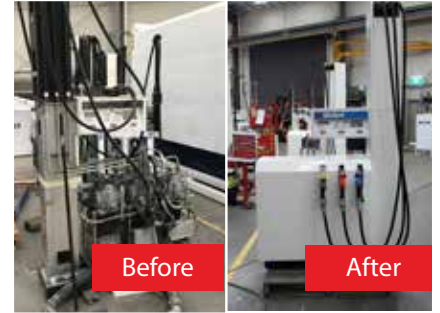

- We come to your site in our fully equipped mobile service van for all repairs and maintenance works of fuel tanks and related equipments
- We provide advice on product storage, legislation and site requirements
- Technical advice and support over the phone for emergency or after hours breakdowns

TANK & EQUIPMENT REPAIRS

- Fuel tank and dispensing equipment repairs and maintenance as per compliance requirements
- Repair and maintain tanks and equipment installed by other suppliers
- We upgrade existing infrastructure and equipment where required
- Fuel and tank cleaning without emptying tank
- Pump and pipeline testing

REFURBISH PUMPS & BOWSERS

- Refurbish used fuel pumps and bowsers
- Complete reconstruction of equipment by our qualified technicians
- Cleaning, rebuilding and recalibrating existing pumps
- Breakdown repair of fuel management and filtration kits

UPGRADES TO FMS & PUMPS

- Maintain, test or upgrade existing fuel management systems and pumps
- Increase automation or add new control features
- Comply to legislative requirements
- Technical advice on a range of models
- Scheduled maintenance and environmental visits

COMPLIANCE CHECKS

- Full recommendations for repairs and fuel system upgrades to reach full compliance, or remain compliant when the regulations are updated
- Compliance, audits & inspections and checks for:
 - leaks or damage
 - corrosion, rust or crack
 - warping or deformities
 - vents and gauges
 - fuel system audits
 - changes to supporting structure or base etc

CLEANING & RESTORATION

- Fast & cost effective fuel cleaning through to a comprehensive 3-stage tank clean and fuel restoration service to ensure premium fuel quality at all times
- Full service report including product quality check and fuel inspection report
- Microbial growth removal and treatment to reduce the reoccurrence rate to almost zero
- Eliminate problems with blocked filters and improve the functionality of pumps and ATGs

PREVENTATIVE MAINTENANCE PROGRAM

Fuelco has **Preventative Maintenance Program (PMP)** aimed to reduce breakdowns and expensive unplanned repairs. Joining the PMP schedule will reduce your costs versus the cost of urgent breakdown callouts.

We offer a comprehensive Preventative Maintenance Program with above ground tank purchase.

A regular scheduled inspection by our qualified service fitters ensures your fuel equipment remains calibrated and compliant with NMI requirements. Depending on tank and dispensing system, we can arrange for a 3, 6 or 12 monthly maintenance program.

Our Preventative Maintenance Program covers inspection and testing on the below:

- Bowsers / dispensers
- Tanks and Fuel
- Pipeline testing
- Fill and dip points
- Vents
- Emergency stops
- Fuel management systems
- Calibration certification
- Automatic tank gauging
- Over fill protection
- Bulk transfer pumps
- Electrical and mechanical requirements

PARTS AND ACCESSORIES

We have an extensive range of specialised fuel storage tank parts and accessories that comply with the relevant Australian Standards.

Our large stock of parts and accessories includes:

- Pumps (Piusi, Fillrite and other models)
- Adblue equipment
- Fuel bowsers and fuel dispensers
- Fuel management (SmartFill, Piusi, Compac etc.)
- Flow meters (Fuelco, TCS)
- Nozzles / swivels / breakaways
- Filters
- Workshop service management systems
- Oil / grease equipment
- Hoses and hose reels
- Tank monitor / level gauges
- Fuel tank fittings and accessories
- Drum handling equipment
- Spill kits and safety equipment

FUEL DISPENSERS (Fuelco, PIUSI)

FLOW METERS (Fuelco, TCS)

FUEL MANAGEMENT SYSTEMS

FLUID MONITORS (Fuelco, PIUSI)

PUMPS & KITS (Fuelco, PIUSI, FILLRITE)

NOZZLES & SWIVELS

WHY FUELCO

Fuelco provides effective and efficient solutions for fuel storage and delivery systems.

Our expert knowledge, engineering insight, product sophistication and technical expertise has earned us the reputation as problem-solving innovators.

Our full spectrum of capabilities in fuel storage and dispensing systems includes design, construction, project management, maintenance and repair.

Underpinning everything we do is an unwavering commitment to the highest safety and compliance standards that save our clients time and money.

Contact us today and find out how our tank inspection, audit and calibration services can ensure the safety and integrity of your refuelling systems.
